

Project Smile

DENTAL CARE FOR FORT COLLINS CHILDREN

Salud Family Health provides dental screenings for children throughout the Poudre School District.

When follow up treatment is needed, **Project Smile** steps in to cover the cost of that care for children and families in need.

Services are provided by Salud Family Health and partnering dentists in our community.

Your contribution can transform a child's life and ensure every child in Fort Collins has access to the dental care they need to thrive and lead a healthy life.

Why Your Support Matters

Together, we can ensure all children receive appropriate, timely dental care regardless of their insurance status or financial barriers.

Dental health contributes to a child's ability to learn in the classroom, free of dental pain, and the confidence to share their smile!
